### **Electricity Act 1989 Electricity Generating Stations (Variation of Consents) (England and Wales) Regulations 2013 Sheringham Shoal Offshore Wind Farm**

## **Stakeholder Consultation Letter**

I am writing to advise you that Scira Offshore Wind Energy Ltd (Scira) have now submitted an application to vary the Section 36 Consent for the Sheringham Shoal Offshore Wind Farm to the Secretary of State for Energy and Climate Change (DECC) who has accepted the variation application.

The application is made to amend two parameters:

- The installed capacity of the project (316.8MW from 315MW); and
- The red line boundary of the project (in order to accommodate three very small stretches of inter-array cables that have been installed within 36m of the existing red line). The figures attached to this letter shows the Section 36 consented area and the proposed additional area required to accommodate the inter array cables.

A full copy of the application is available on our website at <http://www.scira.co.uk>.

If you wish to make a formal representation about the offshore variation applications, please send your response to DECC by the 09<sup>th</sup> January 2015 at the following address:

National Infrastructure Consents  
Department for Energy and Climate Change  
3 Whitehall Place  
London  
SW1A 2AW  
For the attention of Robert Lilly  
[offshore.renewables@decc.gsi.gov.uk](mailto:offshore.renewables@decc.gsi.gov.uk)

The deadline for representations is 09<sup>th</sup> January 2015 and all consultation responses received by DECC will be copied to Scira and may be copied to the MMO.

I would also be happy to answer your questions directly and you can contact me on:
